NUMBER 20

## THE GAZETTE.

WEDNESDAY, MARCH 21, 1886.

THE PRICE OF LIFE.

Mr. Edward Atkinson, of Boston, is a political economist of national reputation. He is a rich man, and spends thousands every year in maintaining his family. In many respects he is a theorist, and at all times does not practice what he preaches. He is one of the men who think that people spend too much for their support, while they lavish thousands upon themselves, thus giving public notice that they write for benevolence and not for the practical benefit of the people. He is [Dr. Dio Lewis who maintained vigorously that a man could live well on five cents for a meal and ought not to expend more than that if he wanted healthful food, but the doctor was living in opulence while he was writing and speaking, for five cents per day living. Henry Ward Beecher had a hobby a few years ago that a working man ought not to spend more than one dollar a day in supporting a family of six persons, and to expend more than that was a prodigious use of money. But the Brooklyn pastor was then living, and has lived ever since, at the rate of from \$10,000 to \$15,000 a year.

In Mr. Atkinson's late article on "the price of life," he starts out with the statement that it is "an urgent problem for millions how to get a good subsistence for less money than they now spend for a poor one. The way for the working classes to improve their condition is to produce more or waste less. When each one has found out this secret for himself the labor question will be practically settled. All there is in it is how to answer the all-absorbing question 'what is the price of life?' He also says:

"The magnitude of this problem to the people of the United States appears from the fact that 83 per cent. of them trust their daily work for the daily price of their own lives, of those who depend upon them. In the working classes, in the narrow sense of that term, are rock-wool laborers, servants, mechanics, and factory operatives, with whom may be included teachers, clerks, salesmen, salaried men, and the like. In the strictly working class may also be included 90 per cent. of all the farmers who own their own land, but who work harder than any of their hired men. To all such persons the price of life is the one question which is ever before them."

Mr. Atkinson then goes on to show upon paper how a man can live well on \$12 a year. He first states that rent ought not to cost more than \$30 a year for two comfortable rooms. That \$15 a year is enough to clothe a man well and give him an excellent outfit, but that it can be reduced to \$25 or \$40 by wearing an overcoat that costs less which is good enough for any man who is not rich. For food, which is the most important item in the cost of living, Mr. Atkinson says that from \$70 to \$80 a year is enough. He claims that the science of nutrition, which is now being investigated both in this country and in Germany, shows that a man can live well on 10 to 18 cents a day. This is done chiefly by using stews instead of roasts, and of good sound bread for dainties and not biscuit. He then asks this question:

"How long will it take after the taste of the people from fried food and not biscuit to stowed food and sound bread? If this can be done, as it now seems possible, the price of a well-conditioned life in the city of Boston for food, shelter, clothing, fuel, and laundry may be reduced by the sum of \$172, leaving within the limit of \$220 a year \$38 for sundries or luxuries."

He claims that the waste of food in this country amounts to more than one billion a year, and that the best labor reform of the time would be that which would teach workmen to change their manner of living, and teach themselves to buy good subsistence for less money than they now pay for that which is poor. It is a readable subject to write upon for it creates something like a sensation, but the story foot still remains that Mr. Atkinson does not find a practical way of living, American workmen will buy such a living as they desire, limiting it, of course, by their ability to pay; but the time has not come and probably never will, when the prosperous mechanics, workmen, clerks and so on, will adopt the joint-stock system that so generally prevails in England. It is no doubt true that the American people pay too dearly for life, but the plan to cheapen it suggested by Mr. Atkinson, is not one of the reforms that reasonably thrifty people will adopt.

A Galveston, Texas, dispatch of the 20th says, "An exceedingly cold north wind for this season of the year, accompanied by snow, set in last night and is still blowing. Dispatches from distant points in the state show that the cold wave is fully a thousand miles wide, as it covers the entire state. It is thought the snow fall extends across the Pan-handle into Mexico. Many thousands of the sheep in the snow belt have been sheared during the past two weeks, and the stockmen fear heavy losses."

The failure of the Lumber and Coal Company, says the Railroad Gazette, caused a suspension of operations at their works at Millington in November, 1884. One of the failures was their banked up and hermetically sealed, being left in. On March 21st the furnace was opened for the first time, having been closed for sixteen months. The fire was found to be still burning, the coke glowing brightly, and on the admission of air soon became hot enough to melt under. It was as easy a matter to start the furnace as if it had been standing but a week. This is believed to be one of the longest instances in which fire had been kept in a furnace without the addition of fuel.

Attholpore meets with a fair sale here. One or two persons say that it has cured them of rheumatism, and others that they have been helped somewhat. Only one says that it did no good. I. L. Graham, druggist, Muscatine, Ia.

## MIGHTY HARD TO MOVE.

THOSE IDLE WHEELS ON THE SOUTH-WESTERN SYSTEM.

Another Agreement Arrived at by the Representatives of Both Sides.

Orders to Go to Work Telegraphed to Front, Who Seem Inclined to Ignore the General Master Workmen. While Hoxie Is Apparently Determined to Ignore the Knights.

New York, March 21.—The Knights of Labor executive board, with Mr. Powderly at its head, went into conference with Mr. Gould, George Gould and Vice President Hopkins, of the Missouri Pacific, Tuesday morning at 11 o'clock, and did not adjourn until 8 p. m. The discussion seemed to have taken a wide range and included a talk on the best action companies could take to prevent time strikes in the future.

During the conference the following telegram was received by Mr. Gould from Mr. Hoxie: "The number of trains is largely increased on all lines; 113 freight trains were moving on the entire system yesterday. The International & Great Northern and Missouri, Kansas & Texas, in Texas, are thoroughly opened, except at Alvarado, also the entire line from Mountain View to Pacific and including Kansas City. The Atchafalpa & Texas Central branches of the Missouri, Kansas & Texas are now open except at Parsons, Alvarado and Hamilton, where the authorities have not got control of the mob. At Topeka, Kansas, and Alvarado the authorities have not obtained control. The situation at Kansas City and Atchafalpa is equally improved and as far as reported our business is quiet."

Mr. Powderly's proposition was that a committee of the Knights of Labor have a conference with Mr. Hoxie at St. Louis and settle the matters in dispute the men in the mountains to go to work at least this morning. To be about what was done, Mr. Gould is said to have referred the matter to Mr. Hoxie by the following telegram which Vice President Hopkins sent:

"New York, March 21.—Mr. Hoxie, Vice President, St. Louis. Will you confer with the general executive board of the Knights of Labor or with a committee of your employees who are Knights of Labor, for the purpose of having their complaints were and for the purpose of making a settlement of present difficulties all honorable to both sides either on a basis of arbitration or by mutual agreement the same to be binding on all parties."

Mr. Hoxie's reply was:

"St. Louis, Mo., March 21.—To A. L. Hoxie, New York: Replying to your inquiry for Mr. Powderly's answer to the telegram which was received from Mr. Gould the following dispatch (Mr. Gould's instructions to Mr. Hoxie are quoted), to which I sent the following:

"St. Louis, Mo., March 21.—To J. W. Gould, Esq., New York: I have your message in relation to your interview with Mr. Powderly; also the letter of instructions, and I will carry them out to the best of my ability."

(Signed) H. M. Hoxie.

I am therefore willing to meet a committee of our employees, without discrimination, who are actually at work in the service of the company at the time such committee is appointed to adjust with them any grievances they may have."

(Signed) H. M. Hoxie.

After having received Mr. Hoxie's dispatch Mr. Powderly issued the following to be sent:

New York, March 21.—To Mr. Hoxie, Vice President, St. Louis: Have been in conference all day with the result that Vice President Hoxie agrees to the following: (repeating Hoxie's telegram.) Reply to your telegram, and accept of the terms of the agreement, and also select a special committee from the employees of the Missouri Pacific to wait on Mr. Hoxie to adjust any grievances. He is to be as quick as possible. The board will leave for St. Louis to-morrow."

(Signed) FREDERICK TURNER, General Secretary and Treasurer.

Mr. Powderly left at once for St. Louis. Mr. Turner, Hayes and Bailey will go to St. Louis at once.

Mr. Turner was asked if he thought Mr. Hoxie and Mr. Gould were sincere. He replied: "We have no means of judging, except by what has been said and done. These men, however, are sincere, and I am sure they will use every effort on our part to settle the trouble honestly and objectively."

Mr. Powderly was so ill Monday evening that it was necessary to summon a physician to his bedside. In addition to other ailments he suffers somewhat from rheumatism, the effect of the recent great mountain strain. Despite the doctor's orders, Mr. Powderly read and answered a large number of telegrams during the night.

IRONBOLD INCLINED TO REBEL.

Powderly's Orders Received, But Not Obedied—Strike News.

St. Louis, March 21.—The report of the conference in New York Tuesday, and its results, has been telegraphed to this city, and made public. Irons, however, says he has received nothing, and that no orders will be issued to the men to return to work. The executive board also refuse to say a word to reporters. They declare nothing has been done by their board, and it now looks as if they intended to let the men go, at least that they will not obey his orders until they are forced to do so.

Manager Hoxie was asked Tuesday if he would consent to an arbitration of the 30th says, "An exceedingly cold north wind for this season of the year, accompanied by snow, set in last night and is still blowing. Dispatches from distant points in the state show that the cold wave is fully a thousand miles wide, as it covers the entire state. It is thought the snow fall extends across the Pan-handle into Mexico. Many thousands of the sheep in the snow belt have been sheared during the past two weeks, and the stockmen fear heavy losses."

The failure of the Lumber and Coal Company, says the Railroad Gazette, caused a suspension of operations at their works at Millington in November, 1884. One of the failures was their banked up and hermetically sealed, being left in. On March 21st the furnace was opened for the first time, having been closed for sixteen months. The fire was found to be still burning, the coke glowing brightly, and on the admission of air soon became hot enough to melt under. It was as easy a matter to start the furnace as if it had been standing but a week. This is believed to be one of the longest instances in which fire had been kept in a furnace without the addition of fuel.

Attholpore meets with a fair sale here. One or two persons say that it has cured them of rheumatism, and others that they have been helped somewhat. Only one says that it did no good. I. L. Graham, druggist, Muscatine, Ia.

It was as easy a matter to start the furnace as if it had been standing but a week. This is believed to be one of the longest instances in which fire had been kept in a furnace without the addition of fuel.

Attholpore meets with a fair sale here. One or two persons say that it has cured them of rheumatism, and others that they have been helped somewhat. Only one says that it did no good. I. L. Graham, druggist, Muscatine, Ia.

The failure of the Lumber and Coal Company, says the Railroad Gazette, caused a suspension of operations at their works at Millington in November, 1884. One of the failures was their banked up and hermetically sealed, being left in. On March 21st the furnace was opened for the first time, having been closed for sixteen months. The fire was found to be still burning, the coke glowing brightly, and on the admission of air soon became hot enough to melt under. It was as easy a matter to start the furnace as if it had been standing but a week. This is believed to be one of the longest instances in which fire had been kept in a furnace without the addition of fuel.

Family scales at Metcalf & Gowsley's.

Home packed salt pork warranted, 8 cents per lb. East End Grocery. BRACE & BROWN.

Try Elecampane Cough Syrup Eldridge keeps it.

CITY CONVENTION.

The republican convention for the nomination of candidates for city officers, and for the transaction of such other business as may properly come before it, will be held at the common council room in said city, on Saturday, the 30th day of April, 1883, at 10 o'clock in the afternoon. Each ward will be entitled to delegates as follows: First ward, seven; second ward, five; third ward, four; fourth ward, six; fifth ward, two.

By order of city committee.

H. F. BLISS, E. W. VANDERLYN, O. H. PETHERS, N. SMITH, A. P. DUNN, WILSON KANE, Republican City Committee.

Dated March 28th, 1883.

WARD CAUCUSES.

FIRST WARD.

The republicans of the first ward will meet in caucus at the vest side engine house, on Thursday evening, April 1, 1883, at 7:30 o'clock p. m., to elect ward delegates to the city convention, and to nominate ward officers.

By order of the ward committee.

SECOND WARD.

The republicans of the second ward will meet in caucus at the engine house, on Thursday evening, April 1, 1883, at 7:30 o'clock p. m., to elect ward delegates to the city convention, and to nominate ward officers.

By order of the ward committee.

THIRD WARD.

The republicans of the third ward will meet in caucus at the court house, on Thursday evening, April 1, 1883, at 7:30 o'clock p. m., to elect ward delegates to the city convention, and to nominate ward officers.

By order of the ward committee.

FOURTH WARD.

The republicans of the fourth ward will meet in caucus at the common council room, on Thursday, April 1, 1883, at 7:30 o'clock p. m., to elect ward delegates to the city convention, and to nominate ward officers.

By order of the ward committee.

FIFTH WARD.

The republicans of the fifth ward will meet in caucus at the office of Dr. Q. O. Satchell, on Thursday, April 1, 1883, at 7:30 o'clock p. m., to elect ward delegates to the city convention, and to nominate ward officers.

By order of the ward committee.

MILWAUKEE.

—Polo Friday and Saturday, Muncies, of Indiana, vs. Janesville.

—Wisconsin Lodge No. 14, I. O. O. F., occupy Old Fellows hall this evening—regular weekly session.

—The funeral of Mrs. Theodore Ballou will be held at her late home in the second ward, on Friday afternoon.

—Some of the farmers who came in this morning used sleighs instead of wagons, and it looks now as if wheels would be clear before for a day or two.

—Reserved seats for the polo game Friday will be on sale at Prentice & Evenson's Thursday morning 9 o'clock. Hereafter several more users will be employed and no one will be allowed in a reserved seat who has no check for the same.

—This season the agency for the Ohio Champion reaper and self binder will be with Murdoch & Fisher, it having been transferred to them from Metcalf & Gowsley, by Mr. John Broderick, general western agent. The Champion is a splendid harvester, and is a great favorite among the Rock county farmers.

—The many friends of City Treasurer J. A. Blount will be pleased to learn that he had a good night's rest last night and that his condition is much improved this morning. He has been able to sit up a part of the day, and will be at his office by the end of the week, unless otherwise unforeseen occurs to prevent.

—Indiana has two polo leagues, the Hoosier state and the Indiana state league. The Muncies, who play here Friday and Saturday of this week, are the champions of the Hoosier league and the Massetts, of the Indiana state. The Muncies play a scientific game and Kirk, their first rusher, is said to be the best coacher in the west.

—Madison Journal:—"From the middle of last April, when the present common council assumed control of the municipal affairs of Madison, up to the 1st of this month, the amounts of water rents received was \$9,644.53. The operating expenses and amount paid for repairs for the same period aggregated \$6,083.45."

—It commenced snowing at about four o'clock this morning, and the storm has continued all day. The depth of the snow, which is very wet and heavy, is estimated at one foot or more, and the storm continues. People living along the river bank will now have cause for alarm on account of high water, as the river will certainly "go up" another foot or more, if it does not reach the "high water mark" of 1881.

—This morning at four o'clock the south-bound freight on the Chicago & Northwestern met with an accident that delayed travel over the line for several hours. The trouble was caused by a broken flange and it so happened that only one car was derailed. The mixed train from Oshkosh came here at seven o'clock, was held about three hours by the accident which happened four miles north of this city.

—A Watertown dispatch in the Evening Wisconsin of last evening, says: "The Pipeville water power, five miles east of this city, on Rock river, established in 1841, has been purchased by the town of Ironia Water League for \$4,500, and the work of removing the dam will be proceeded with at once. With the dam taken away it is expected that a large amount of land now overflowed will be reclaimed, and the water power here improved."

—The editor of the Recorder could hardly please the public better than by giving a thorough expose of what he terms a ring, or in other words "a slate already made up for the republican electors of the second ward." We know of several good and prominent men spoken of in connection with the nomination for alderman in the second ward, namely: Mr. John Thoroughgood, Mr. P. G. Strickler, Mr. O. F. Nowlan, and Mr. G. Veeder, but we are not aware of any slate or ring at work in the interest of the above named gentlemen. Will the Recorder give us a pointer?

—The following item published in the Chronicle of March 26th, created considerable amusement at Albany, where the parties reside and are well known and respected. The "joke" will be understood when we state that Mr. and Mrs. Van Patten were married a dozen years or more ago, and their home has been

Blessed with several children. But here is the item:—"Mr. and Mrs. E. Van Patten, of Albany, Green county, were in the city yesterday on their way to Chicago, on their wedding tour. They were accompanied by Miss Cora Roxie a sister of the bride."

—To the young man who wants to be up with the times, nothing is more essential than a first class tailor. Everyone appreciates this fact and to this appreciation is due the large custom that J. L. Ford receives. He takes special pains that every suit made by his workmen shall be first class, and besides that he always has on hand a line of goods fully up to the fashions. "This year he shows an especially fine line of goods in cloth for overcoats, suits and pants, new wear-hats, both stiff and soft, in all the fashionable shapes, conductors' silk caps, and all kinds of gentlemen's furnishing goods. Look over his advertisement, and then pay him a visit.

—Last night Lewis, Green who has been lying sick at the home of William Lepper, in the fifth ward for some time past, was attacked by palpitation of the heart and died almost immediately. The deceased was a young man only about twenty years of age and was a student at Valentine's School of Telegraphy. Over three weeks ago he was taken sick with scarlet fever but had almost recovered. He suffered a relapse however and despite the efforts of physicians the grim messenger conquered. His mother arrived at the bedside yesterday and did all in her power to make his dying moments easier, although his friends here had done what they could to fill her place before she came. This afternoon at half past two Mrs. Green started with the remains for her home at Minden, Michigan.

—On last Sunday morning Mrs. T. Keys living at the corner Jackson and Wall streets, felt a strange sensation in her eyes. She thought nothing of it but at church in the evening she felt it again. Soon after going home she returned for the night sleeping soundly until about midnight. Then she awoke and frightened by the pain in her eye she called for a lamp. One was brought but she could only see a faint faint ray of light and early in the morning she was taken to Dr. Q. O. Satchell's office for examination. It was found that one eye was entirely blind while the other was nearly so, she not being able to see across the room with it. This morning at seven o'clock she was taken to Chicago by Dr. Satchell and the case will be laid before eminent oculists in that city. No reason can be given for this sudden blindness as Mrs. Keys had not been sick and had never had any trouble with her eyes.

TRANSFERS OF ROCK COUNTY REAL ESTATE.

The following real estate transfers were recorded during the week ending March 26th, as reported by C. E. Bowles, Real Estate and Loan Agent:

Teodore Butts to William R. Catton, 1/2 section 34 and 1/2 section 35, Twp. 10 N., R. 10 E., 1/2 sec. 34, 1/2 sec. 35, 1/2 sec. 36, 1/2 sec. 37, 1/2 sec. 38, 1/2 sec. 39, 1/2 sec. 40, 1/2 sec. 41, 1/2 sec. 42, 1/2 sec. 43, 1/2
